

Opposed to the Governor's H.B. 6816

Microstamping? Investigating the technology of microstamping is nothing other than a huge waste of taxpayer's money that surely could be used more effectively on solving or eliminating crime. Crimes committed by the same folks who surely will defeat the technology of microstamping prior to committing a crime with the subject firearm or simply chose to buy one of the tens of millions of firearms that do not employ the technology. Can the State of Connecticut please waist their time and taxpayers money on something less absurd?
